

WHY “ONE POLICY” MATTERS

REASONS TO CHOOSE A PROFESSIONAL PACKAGE POLICY WITH THE PHYSICIANS PROTECTOR PLAN

Isn't it about time that there was an insurance product that simplifies the management of physician practices? PracticePRO+, developed by the Physicians Protector Plan, is a one of a kind insurance solution able to combine professional liability coverage with general liability, commercial property, employment practices liability coverage and much more all on ONE policy.

DISCOVER WHAT ONE POLICY COULD DO FOR YOUR PRACTICE:

Ease & Convenience

ONE policy means ONE application, ONE invoice, ONE common policy expiration date, and simplified claim reporting procedures. Best of all, renewal applications are typically only required once every three years.

Premium Savings

We eliminate redundancies associated with having multiple policies. Our ONE policy approach allows us to streamline the quotation and policy issuance process. This enables us to pass savings along to you. Furthermore, we discount the professional liability premium when the other coverages are included

Coordination of Coverage

Having ONE company insure multiple aspects of your practice can mean the world of difference when there's a claim. This is particularly true for "gray area" claims that can be considered either professional liability or general liability claims. Having one company cover professional liability as well as general liability eliminates the risk of coverage problems that can occur when multiple insurance companies get involved in a claim.

Expertise

You deserve an insurance product tailored specifically to the needs of physician practices. Insurance for physician practices is all that we do. Our coverage forms were designed with the physician practice in mind.

SIMPLIFIED INSURANCE SOLUTIONS

FOR TODAY'S PHYSICIAN PRACTICES.
